Relevant Experience

**Web Developer, Spiela,
London, United Kingdom**

March 2020 – February 2022

- I built the web application and enhanced the layout and functionality from the previous version.
- I improved the web application to provide better user experience and being able to reach a larger audience and also creating the platform for an online community for people to discuss key issues in the society.
- **Achievement:** Revamped the Web platform which increased the user experience and engagement.
- **URL** – <https://spiela.co.uk>

**Web Developer (Intern),
IAmTheCode, London, United
Kingdom,**

December 2020 – January 2021

- I handled the project called Accur8 Africa, and upgraded the website by integrating features that relate to Digital Marketing, Cyber Security and Artificial Intelligence.
- **Achievement:** The web platform improved from its previous state.

**Web Developer (Intern), Future Care,
London, United Kingdom,
November 2019 - Jan 2020**

- Managed the company CRM (Customer relationship Management) system using HubSpot.
- I raised efficiency and productivity immensely in the number of sales from prospects.
- Enhanced to give clients a richer experience when accessing the website.
- **Achievement:** Developed Futurecare and Falls predict using WordPress as project.
- **URL** – <http://www.fallspredict.com>

**Software Developer, Infinity Genius,
Lagos, Nigeria,**

Jan 2018 - June 2019

- Contributed in developing a web platform for the music artiste in reaching a larger audience.
- Built a feature in the web platform to allow users sample songs and buy the full album.
- Negotiated contracts with the vendors for payment gateway system, which further reduced the cost, while raising more profit to the artiste through the use of the e-wallet feature in the website.
- Contributed in developing a web platform for a school agent.
- Increased the experience, leading to increased profitability.
- **Achievement:** Developed an E-wallet application for users to make payment on the web platform and creating a Content Management System (CMS) to give the client full control on the websitelayout.

Web Projects

Web Developer, Hotel App

- I developed a hotel platform where customers can go and check for available rooms, view the rooms that are available in a calendar and be able to book the room.
- The platform also connects to PayPal payment API to access payment
- **Achievement:** A full working platform that consists of a restaurant, admin and user portal
- **URL** – <https://scotttnaghor.com/hotel/home>

Web Developer, E-commerce App

- I built an eCommerce application using PHP for my Undergraduate degree project about how to improve the shopping experience of online shoppers.
- The platform had an inbuilt digital wallet and membership feature to ease the shopping experience of online customers.
- The platform also connects to PayPal payment API to access payment
- **Achievement:** Achieved a Distinction on my Dissertation
- **URL** – <https://scotttnaghor.com/ecommerce/home>

Web Developer, Fast Food App

- The platform has a delivery fast food application that can allow users to schedule when they want their meals to be delivered to them.
- The platform also connects to a Stripe Payment gateway to access payment
- **Achievement:** An optimized web application that has a staff and user's section.
- **URL** – <https://scotttnaghor.com/fastfood/home>

Flutter Developer, EatandMore

- I worked on the Fast-food mobile app which delivers various foods to their customers in the United Kingdom
- **Achievement:** The layout of the application was improved and was able to publish on the Google Play Store.
- **Google Play Store:** EatandMore

Web Designer, Makhbess

- This platform is built for a client who is in the Film industry to share and advertise the various films and trailers that the client has worked on.
- **Achievement:** The web platform has a video player feature to give user's the access to watch some trailers of the client films.
- **URL:** <https://makhbess.com>

Web Developer, Royal Ethon Academy

- This project is for a school platform where students and teachers can access their online portals and be able to track their grades, attendance, training, classes and other academic activities on their dashboard.
- The admin of the platform could monitor all the activities in the school from business to academic and the progress of the staff.
- **Achievement:** The web platform made it easier for students to access their grades and teachers to monitor their students' progress.
- **URL:** <https://royalethonacademy.com>

**Web Developer,
MaidinChelsea Cleaning**

- This platform is built to equip the owner to provide their cleaning services to their clients in South West London.
- The admin of the platform could monitor all the activities in the platform and can make changes which are similar to a Content Management System.
- **Achievement:** The website provided the owner with a platform to market their services and business.
